Jonatan Gustavo Eslava Atenogenes

Software Engineer | JavaScript & TypeScript | React / .NET

Toluca, México | 7224384991 | jonatan.atenogenes.dev@outlook.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Computer Systems Engineering with hands-on professional experience building modern web applications using React, TypeScript, and REST APIs in an enterprise environment. First-place winner of the Genius Arena Hackathon 2025, delivering a functional, scalable mobile solution under tight time constraints. Strong fundamentals in JavaScript/TypeScript, frontend architecture, and collaborative development using Git. Comfortable working in cross-functional, English-speaking teams and eager to grow under the guidance of senior engineers.

FEATURED ACHIEVEMENT — GENIUS ARENA HACKATHON 2025

1st Place — Coppel Challenge: End-to-End Mobile Solution for Microentrepreneurs

- Contributed to the technical development of a React Native + Firebase mobile application designed to help microentrepreneurs manage and grow their businesses, competing against multiple teams under a strict time constraint.
- Developed the application's main screens, including a usage analytics module to monitor user engagement and an AI-powered voice recognition module for hands-free interaction.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, SQL

Frontend: React, React Native, HTML5, CSS3, DOM manipulation

Backend & APIs: .NET, REST API design and consumption, Firebase (Firestore)

Testing: Unit testing in JavaScript and .NET

Cloud & Tools: AWS (basic — VM provisioning), Git, GitHub, Visual Studio, Visual Studio Code

Networking: Cisco routers & switches, VLANs, Inter-VLAN Routing, Static Routing, DHCP, DNS, NAT, wireless networks, connectivity diagnostics

PROFESSIONAL EXPERIENCE

DevOps Intern | Daimler Truck México — OPT / HR Technology | Toluca, México

August 2025 – August 2026

- Built and maintained frontend features in React and TypeScript as part of the re-engineering of three enterprise HR modules, migrating from legacy ASP Classic to a React + .NET architecture.
- Developed and consumed REST APIs to integrate frontend components with backend services on the company's internal platform.
- Wrote and debugged code across development, testing, and deployment stages, including unit tests in JavaScript and .NET, and performed root-cause analysis to resolve defects.
- Collaborated with cross-functional HR stakeholders in a corporate, international environment, using Git for version control and code collaboration.
- Produced technical documentation to support code maintainability and team knowledge transfer.

TECHNICAL EXPERIENCE (ACADEMIC)

Networking — Cisco Networking Academy

2024

- Completed CCNAv7: Introduction to Networks, Switching Routing and Wireless Essentials, and Enterprise Networking, Security and Automation.
- Hands-on labs configuring and troubleshooting Cisco routers and switches, VLANs, static routing, DHCP, DNS, and NAT using Cisco Packet Tracer and physical Cisco equipment.

EDUCATION

Bachelor's Degree in Computer Systems Engineering

Instituto Tecnológico de Toluca

LANGUAGES

Spanish — Native | English — B2
